GOW-MAC Series 600 Gas Chromatograph (GC)

November 14, 2017

Instrument instructions can be found at: http://academic.bowdoin.edu/chemistry/resources/instructions.shtml

If you have any problems with the instrument or would like to get trained, please contact Celeste Morin

(x3756 / cmorin@bowdoin.edu / Druckenmiller 243)

- a. **Read instructions carefully before using instrument**. Reading the bold sentences in each category will tell you what you need to know to run the instrument.
 - i. Bullets are under the bold sentences when more detail is required.
 - ii. At the end of the instructions is a frequently asked questions/troubleshooting section.
- a. Methods are developed using the Edit soft key on the Home page.
- b. Depress the Edit key. You will be presented with a choice of what part of the

- d. As soon as the GC is ready for an injection, the *Ready* message will appear in the top left of the screen.
- e. You are now ready to make an injection and initialize a run by pressing the "Run" key on your Action page.
- a. When you want to start a run even though the GC is not ready, you can from the <u>Action</u> page. There are three soft keys on the <u>Action</u> page.
 - i. Run identical in operation to the Run key.
 - ii. $\underline{R/C}$ (Run Confirm) is similar to the run key, except that pressing the \underline{Run} soft key first and then the $\underline{R/C}$ will start the GC whether the system is ready or not.
 - iii. <u>Shutdown</u> this button is used to cool the oven down in a controlled way. That is, the fans remain running, the vent door is open, and the heaters and detectors are turned off.
- b. Therefore, to start a run when the GC is not ready, first go to the <u>Action</u> page, then press the <u>Run</u> key, followed by the <u>R/C</u> key.

Integrator Functions

LIST LIST lists current run parameters.

[SHFT]+OP:2 to set up to be able to rerun at different attenuation (answer the questions after [SHFT]+OP:2)

REA ENTER checks system readiness.

SY ENTER lists current system configuration.

START starts run.

PLOT starts plot without integration.

STOP stops run or plot.

[SHFT] **SEQ START** Starts a sequence of runs.

CHT SP 1 ENTER sets chart speed to 1 cm/min.

[SHFT] **ENTER** advances the paper continuously.

LIST TIME ENTER lists all current timetable entries.

TIME .5 **CHT SP** 7 **ENTER** sets chart speed to 7 cm/sec at 0.5 minutes into the run.

DEL TIME ENTER deletes entire timetable.

DEL TIME 1 ENTER deletes all entries for 1 min.

[SHFT] **PREP** [SHFT] **METH** prepares a method step by step.

[SHFT] **EDIT** [SHFT] **METH** edits an existing method.

[SHFT]

BOLD words indicate a key that is pressed.

Everything else is typed in using the keypad.

Note: Keyboard light flashes after changing paper: push ESC so that future commands are accepted.
