Confirming glycoprotein visualization in Ralstonia pickettii via glycan modifying reagents Missy Demczak, Class of 2021

The increasing ineffectiveness of existing antibiotics due to the evolution of microbial resistance has become a primary concern in the healthcare industry. Even when antibiotics are effective at treating a bacterial infection, these treatments are non-sel microbiome. The World Health Organization has listed resistant bacteria as

need alternative treatments due to their severe resistance to current antibiotics1. As wel

that
